Introduction

We all need more gold, right? Most people would agree that more gold is better and the sooner we get it, the better too.

The world is headed into difficult times right now. Political and economic conditions are erupting everywhere. Gold is a great insurance policy. It will help to protect you and your loved ones.

I have spent more than 45 years finding and producing gold using a wide variety of methods and techniques. Some ways have worked better than others. A few of my methods have worked out spectacularly well.

After all of these years, I have settled on my 9 most favorite and successful ways to find and to get gold. Each of these 9 methods could become a full-time business for you if you like. Each of these 9 ways can allow you to get at least 1/4 oz. of gold per day once you learn the basics.

I have just published a new, free report that reveals all 9 of my favorite methods. Once you read my report, you can determine which of these methods might work best for you. Some of my methods work well anywhere in the world, even if you don't live near any gold deposits.

I hope you enjoy this report and can take some fast action to help bring you more cash and security for the near future.

Why You Need More Gold Right Now...

You don't have to take my word for it. Just read these recent news headlines below from major publications...

PLEASE NOTE: These are only a few of the many hundreds of recent headlines, all saying basically the same thing...

Below, I have taken some excerpts from a very important article **Jim Rickards** wrote recently that was published in the Daily Reckoning. It was entitled,

The Coming Gold “Break Out”

“The physical fundamentals are stronger than ever for gold. Russia and China continue to be huge buyers. China bans export of its 450 tons per year of physical production.

“Gold refiners are working around the clock and cannot meet demand. Gold refiners are also having difficulty finding gold to refine as mining output, official bullion sales and scrap inflows all remain weak.

“Private bullion continues to migrate from bank vaults at UBS and Credit Suisse into nonbank vaults at Brinks and Loomis, thus reducing the floating supply available for bank unallocated gold sales.

“In other words, the physical supply situation is tight as a drum.

“The problem, of course, is unlimited selling in “paper” gold markets such as the Comex gold futures and similar instruments.

“One of the flash crashes was precipitated by the instantaneous sale of gold futures contracts equal in underlying amount to 60 tons of physical gold. The largest bullion banks in the world could not source 60 tons of physical gold if they had months to do it.

There’s just not that much gold available. But in the paper gold market, there’s no limit on size, so anything goes.

“There’s no sense complaining about this situation. It is what it is, and it won’t be broken up anytime soon. The main source of comfort is knowing that fundamentals always win in the long run even if there are temporary reversals. What you need to do is be patient, stay the course and buy strategically when the drawdowns emerge.”

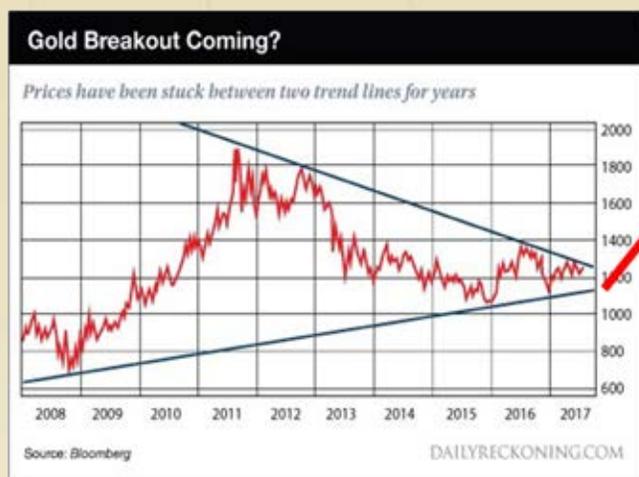

“Finally, we have to deal with our friends at the Fed. The strong jobs report on Friday, Aug. 4, gave life to the view that the Fed would raise interest rates at least one more time this year. Rate hikes make the dollar stronger and are a head wind for the dollar price of gold.”

“A weak dollar is the Fed’s only chance for more inflation. The way to get a weak dollar is to delay rate hikes indefinitely, and that’s what the Fed will do.”

“And a weak dollar means a higher dollar price for gold.”

“Current levels look like the last stop before \$1,300 per ounce gold. After that, a price surge is likely as buyers jump on the bandwagon, and then it’s up, up and away.”

“There’s an old saying that “a picture is worth a thousand words.” This chart is a good example of why that’s true:

“Gold analyst Eddie Van Der Walt produced this 10-year chart for the dollar price of gold showing that gold prices have been converging into a narrow tunnel between two price trends – one trending higher and one lower – for the past six years.

“This pattern has been especially pronounced since 2015. You can see gold has traded up and down in a range between \$1,050 and \$1,380 per ounce. The upper trend line and the lower trend line converge into a funnel.

“Since gold will not remain in that funnel much longer (because it converges to a fixed price) gold will likely “break out” to the upside or downside, typically with a huge move that disrupts the pattern.

“At the extreme, this could imply a gold price on its way to \$1,800 or \$800 per ounce. Which will it be?

“The evidence overwhelmingly supports the thesis that gold will break out to the upside. Central banks are determined to get more inflation and will flip to easing policies if that’s what it takes.

“Geopolitical risks are piling up from North Korea, to Syria, to the South China Sea and beyond.

“Acute shortages of physical gold have set the stage for a delivery failure or a short squeeze.

“Any one of these developments is enough to send gold soaring in response to a panic or as part of a flight to quality. The only force that could take gold lower is deflation, and that is the one thing central banks will never allow. The above chart is one of the most powerful bullish indicators I’ve ever seen.

“Get ready for an explosion to the upside in the dollar price of gold. Make sure you have your physical gold and gold mining shares before the breakout begins.”

I have to agree with Jim Rickards and I think that the price of gold is about to explode upward. I think that one of most important things you could ever do right now would be to acquire (more) gold and silver.

There is only 1 little problem with that.

Gold is very expensive. It would cost well more than \$10,000 just to buy 10 ounces right now. Who has that kind of extra cash laying around?

There is a solution!

There are “little-known ways” you can acquire or obtain gold for pennies on the dollar.

What are these “little-known secrets?”

Some people know about these “little-known ways”, but they don’t know the exact steps to take – one by one - in order to successfully get the gold, every single time they try.

Very few people alive today know the exact steps to take, the ones that guarantee success in obtaining gold for free or cheap, whenever they want.

I guarantee that those who do know “the ways”, are feeling far more secure right now than those who don’t have any gold and know what is coming.

It has taken me 5 long decades of practice and experience to learn the “little-known ways” that I speak of. It has been a long road with many ups and downs. I have documented these years of experience with hundreds of photos. If you care to have a look at some of them, they are posted in these places...

As you can see in many of my photos, a serious portion of my life has been dedicated to finding and acquiring gold. It has been fun and interesting road.

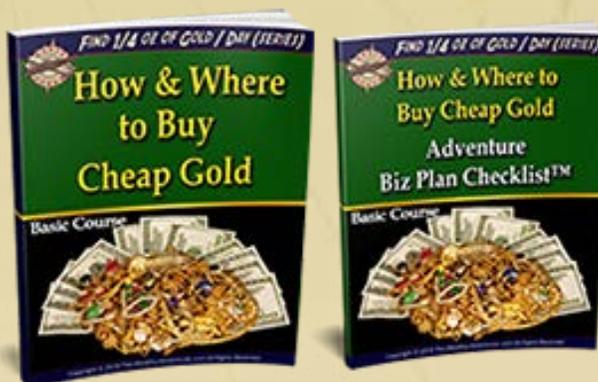

In the past, I have written many articles and books, sharing information about finding gold. I have told a number of my stories. However, I have never shared the exact, step-by-step details of what to do to bring home the gold every single time.

Since time is growing very short, this seems like a good time to spill the beans. Over the years, I have developed 9 different methods of obtaining gold for pennies on the dollar. At one point or another over the years, I have made a full-time living by practicing each of these methods. **THEY WORK!**

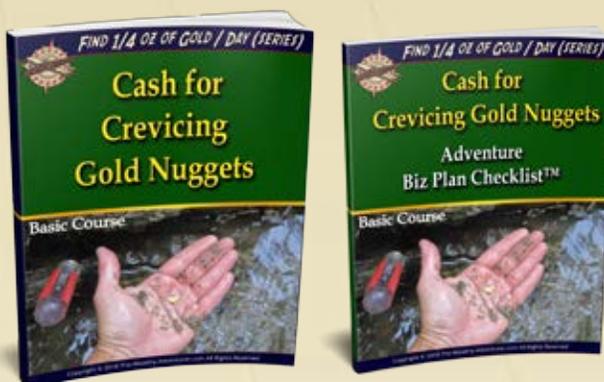

Here are my favorite 9 ways that you can use to get 1/4 oz. of gold per day, or even more. Be sure to click on each of the links to find out more details about each method.

1. [How & Where to Buy Cheap Gold](#) – this method involves learning how, why & where to buy broken jewelry and valuables that people want to liquidate fast.

2. [Cash for Crevicing Gold Nuggets](#) – you can learn how & where to find gold flakes & nuggets trapped in bedrock cracks near the surface.

3. [Lost & Hidden Gold Recovery Secrets](#) – very few people realize how much gold is lost & hidden around the world. Much of this treasure is currently lost due to forgetfulness, accidents & sudden death.

4. [Detect Gold Coins & Jewelry in Virgin, Unique & Forgotten Sites](#) – you can discover how to search historical newspaper archives & use historical map overlays for pinpointing historical virgin ground that is still loaded with lost gold coins & jewelry.

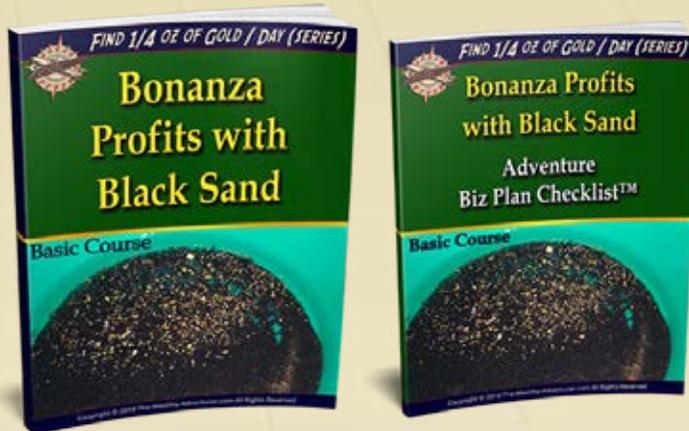

5. [Refine Pure Gold at Home from Junk & Scrap](#) – few people know that pure gold can safely be extracted from scrap electronics, broken jewelry & other sources using basic household chemicals.

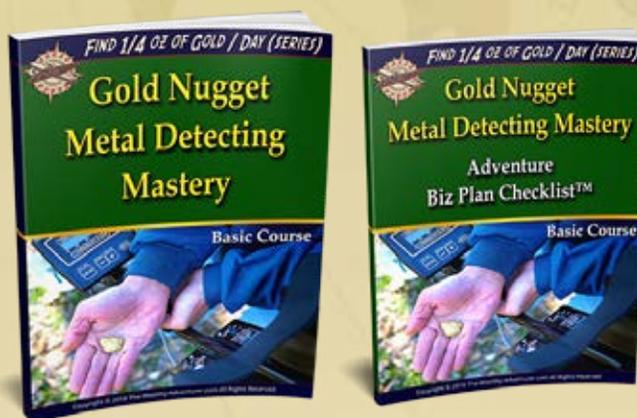

6. [Bonanza Profits with Black Sand](#) – some people are getting rich from buying “garbage” black sand concentrates from gold dredgers and small gold miners. These sands are normally thrown away. Few people understand how much fine gold these sands contain.

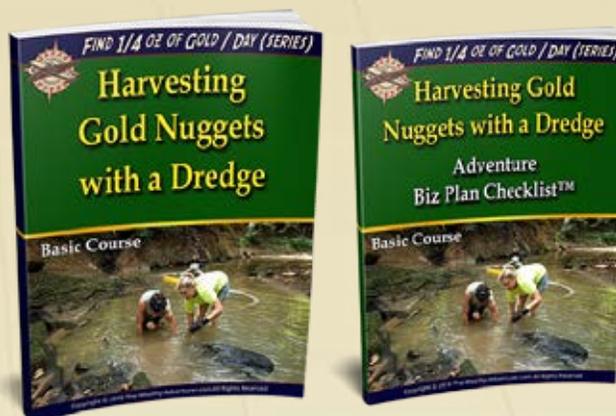

7. [Gold Nugget Metal Detecting Mastery](#) – once you know how & where to recognize Ancient River Gold Deposits, you can quickly scan the most likely places where ancient gold nuggets are close enough to the surface to easily be recovered using a metal detector.

8. [Harvesting Gold Nuggets with a Dredge](#) – if you enjoy working in & around water, you can quickly learn to use a small or large gold dredge to vacuum up gold-bearing gravels from rivers & river banks.

9. [Overlooked Hardrock Gold Specimen Fortunes](#) – with or without a metal detector, people are learning how to identify valuable gold & mineral specimens that sell for hundreds & thousands of dollars in online auctions & public markets.

I have discussed these methods in public before. But I have never shared the detailed steps, in order, of exactly what to do.

Since I am a big fan of making checklists for everything, it occurred to me that documenting all of the details of my 9 different methods should naturally be done with a type of checklist. So, I invented the [Adventure Biz Plan Checklist™](#) to go along with each of my basic training courses.

I have all of my [Cheap Gold Getting Courses](#) on sale for a special, introductory price of only \$9.97. The discount only lasts for 2 days from the time you first visit my web pages. Please hurry and check out your [CHEAP GOLD SOLUTIONS](#) today!
